Hello, I'm Rowley—a **Frontend Developer** specializing in building pixel-perfect, interactive, and accessible user interfaces. I thrive in the sweet spot between design and engineering, translating wireframes into smooth web experiences with extensive CMS platform expertise. As a visually driven developer with a sharp eye for aesthetics, I bridge the gap between creative teams and backend engineers. I bring high energy, fresh ideas, and strong collaborative skills to every project, balanced by a relaxed, grounded mindset.

Experience

Apr 2021 – Jul 2026
De Beers · Senior Frontend Developer

The projects I am proudest of include a complete codebase overhaul (both dynamic and static), comprehensive media optimization, and the design of an entirely new local development environment.

- Rewrote the entire frontend and Amplience codebase using BEM, introducing a new global file naming convention, optimised variables, mixins, and partials while removing redundant code.
- Optimized rendered media (video and image assets) by 50% using modern file formats and implementing Smart Images.
- Created comprehensive visual documentation for team-wide visibility across the entire component and code ecosystem.
- Built a new local runtime environment to run and transpile all static and dynamic Amplience components using Gulp, Webpack, Handlebars, Babel, and Browsersync.
- Delivered high-impact, fast-paced monthly marketing campaigns as core operational responsibilities.

Mar 2019 – Feb 2021
Autosport · Frontend Developer

Key achievements include establishing and integrating legacy and modern components within the Piano Digital Business Platform, as well as developing the company's high-impact annual microsites.

- Set up, integrated, and onboarded the new Piano Digital Business Platform while migrating existing legacy components into Piano.
- Restyled existing legacy components and global navigation architecture.
- Created three high-traffic microsites: Autosport Powerlist of 50 Most Influential People in Motorsport, Autosport Top 50 Drivers of 2019, and the Autosport Awards 2019.

Sep 2016 – Dec 2018
Mulberry · Frontend Developer

The projects I am proudest of include integrating legacy and new components within the Amplience CMS and leading team-wide training

Skills

Programming Languages & Hard Skills

CSS (SCSS/SASS), HTML, Responsive Design, Media Compression & Optimization, JavaScript, JSON Data, Accessible Code/Guidelines, Web Performance Optimization, Testing & Debugging, Handlebars Templates, jQuery, React, NextJS

Tools & Frameworks

CMS Content Editing & Development, Amplience CMS, Visual Studio Code, Bootstrap CSS, Git, Salesforce, Figma, Azure Devops, Confluence, Jira, Hybris (Now SAP Hybris), Gulp, Grunt, Zeplin, GSAP, Tailwind CSS, Foundation CSS, Photoshop, Illustrator, Sublime, Piano DXP, Shopify, BigCommerce

Soft Skills

Tea making, Attention to detail, Communication, Diplomacy, Designs/ Code Audits, User-Centric Empathy, Adaptability, Mentoring, Creative thinking, Accessibility Fundamentals, UI/ UX Design Principles, Design Patterns & Principles, Usability Fundamentals, Agile/Scrum, Time Management, Problem-solving, Client-facing, Client Relationship Management, Team Management, Typography Principles, Colour Theory, German Speaking

on content creation, content management, and publishing best practices.

- Managed pre-production workflows and live updates for the Eccentric Sensibility Korea Fashion Show.
- Created and integrated all legacy and new Amplience CMS components site-wide.
- Restyled pre-Amplience site features, including the Wish List, Global Header, Secondary Header, Videos, and Product Listing Pages (PLP).

Experience (Archive)

Jul – Aug 2016
Aviva · Frontend Developer
Oasis Clothing · Frontend Developer

Rated People · Frontend Developer
Cisco Systems · Web Designer/ Web Analyst/ Frontend Dev
Supply Serve Technology · Designer/ Web Designer
Nikkei NEEDS · Web Designer
NHK Japan · Web Designer
Portobello Festival · Web Designer

Hobbies

In my spare time, you can usually find me hanging out with my wife and two kids, hitting the gym, reading, or watching films (both great and delightfully terrible). I also enjoy diving into music history and flying around Azeroth in *World of Warcraft* in search of rare herbs and quests.

Fun Facts

1992: I established and operated an ostrich conservation farm on the outskirts of Nairobi, Kenya. After achieving a 64% egg hatch rate over two years, I set off on an extensive backpacking trip across Africa.

2007: I embarked on a year-long solo backpacking trip around the world, later self-publishing a travel memoir documenting my adventures.
